**Subject:** Treasure Island Community Involvement

Hi Loren,

As requested, here is a summary of the Navy's plans for enhancing community involvement and communication.

The Navy is planning to:

- Be more PROACTIVE in dealing with the media.
- Take great care to minimize dust and other disturbance in all subsequent field work
- Communicate better to the resident, particularly those at Site 12
- Offer in-house meetings with the residents to answer questions and explain the work

The Navy's goal is to *get ahead* of the Media over the next 3 – 4 months. The Navy has brought in high level people who are tasked with developing a Media Plan.

The Navy is creating a unique Team to deal with the media and become more proactive to communicate a *Fact-based New Stream*.

RAB:

- There is a growing divergence between the Treasure Island Community and the RAB. The long-time RAB members think the Navy is dealing appropriately with radiological concerns at Treasure Island.
- Most vocal community members don't want to join the RAB. They see it as co-opted by the Navy.

This topic was discussed in the March BCT Meeting. There is another meeting on Wednesday. I will provide any updates that come out of that meeting.
